

finding great people

Finding the right people for you

Our professional consultants are amongst the best in the industry and pride themselves on their ability to find the right candidate for the job. At Infopeople, we believe that recruitment should be more than just finding someone to fill a position.

At the heart of our philosophy lies a determination to understand your specific requirements and your company culture. This allows us to successfully place candidates who have the right blend of skills, experience, attitude and personality to fit in and be immediately effective.

Our commitment to ensuring you get the right person is as strong for temporary and contract as for permanent and executive recruitment. We believe that whether you need someone for a day, a month or years, the same care and dedication should be taken to find the right match every time.

The art of predicting quality

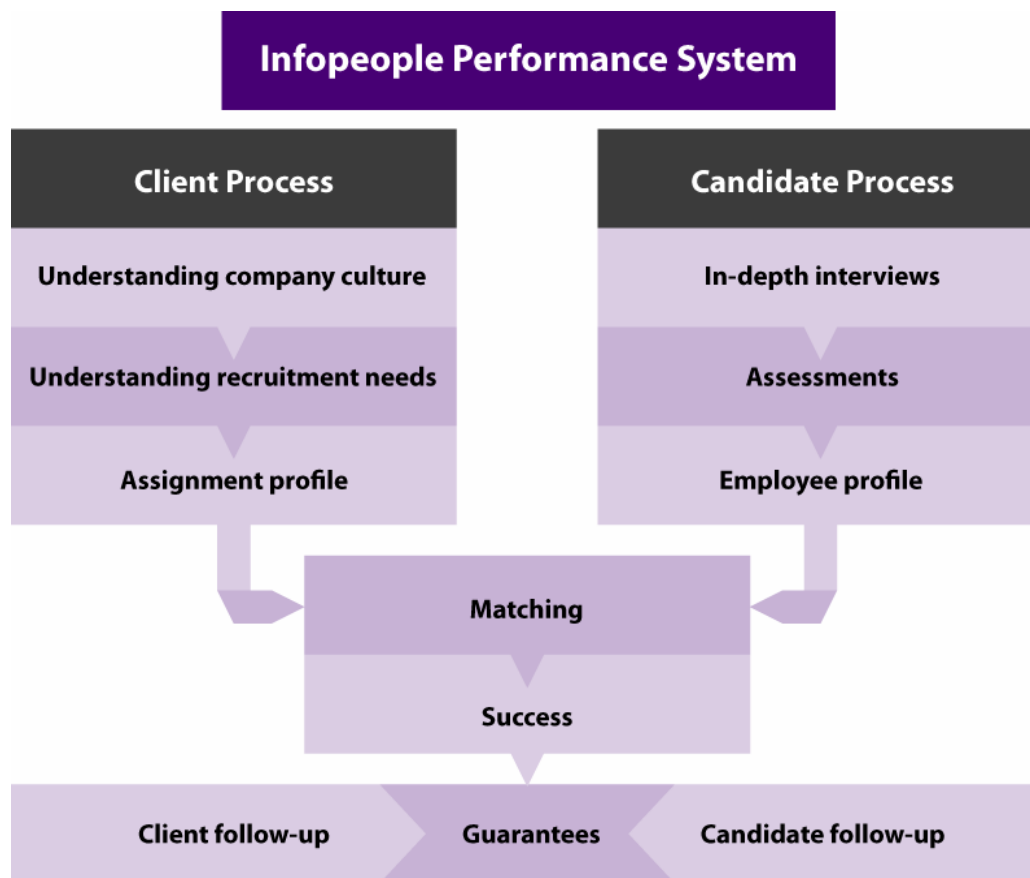

We use a step-by-step quality assurance system that helps us to identify the strongest candidates — the Infopeople Performance System. Client and candidate processes are followed as we work towards a matching stage, when a final assessment is made and the best people are put forward.
